What's New In?

Celiveo Print Direct is a print configuration software. It's designed to eliminate the responsibility for the print server and the printers from the user end. With Celiveo Print Direct, a network administrator can eliminate the central print server and eliminate the server-side support application that typically is a requirement for company-wide printing. It provides print management, flexible printing environments, simple configuration, and secure and easy access to the print system.

Features:

- Support popular printer models
- Eliminate the need for a print server
- Improve overall network performance
- Create secure printing environments
- Support print-related policies
- Reduce printing cost
- Save resources for the entire network

Celiveo Print-Direct is the real-time collector of information from the network, which functions both as an administrator and user of the entire print system. It provides you with all the information that is important to monitor the network and thus, find the root causes of the problems that may appear on the network. You can then easily optimize and improve the performance of the users throughout the network as the data, statistics and reports compiled by the software help you to monitor the current network status and performance of the users.

Celiveo Print Direct Overview: Celiveo Print Direct is the application that works as a central application for a wide range of devices and the whole computer network. The application works with Microsoft Edge and Internet Explorer for the time being. The application is designed to help simplify network configuration and reduce the number of servers that you need on the network. Celiveo Print Direct is a fast and effective tool for your network that combines instant data in one central area, letting you monitor the entire system, and collaborate in real-time with your users. This means that you can prevent most of the errors that may occur in the network and keep the user experience at optimum levels. Celiveo Print Direct is designed with simplicity in mind, allowing you to easily configure the application and use it as a central monitoring tool of your users. Features include Celiveo Print-Direct is a breakthrough application that frees your users from the installation of numerous Windows, printer drivers, or applications. It also helps you to benefit from the LAN effect when using printers. This can help reduce your support costs and time spent on writing and testing codes, especially for the inexperienced users. Eliminate the need for a print server Locate the printer and reduce
